ZHOGIUZH
Eat to Earn

What decision will you make?

A. Buy Organic chocolate with ZHOGIUZH

B. Hold ZHOGIUZH

White Paper & road map

ZHOGIUZH Whitepaper: The Taste of Future on the Blockchain

-Executive Summary

ZHOGIUZH is a pioneering project designed to bridge the gap between high-quality organic consumer goods and the decentralized financial ecosystem. By integrating the Solana blockchain with a premium organic chocolate brand, we offer a unique "Eat-to-Earn" model. Our goal is to promote healthy consumption while providing a seamless entry point into the world of digital assets.

The Vision

We believe that the future of commerce lies in rewarding loyalty and health-conscious choices. ZHOGIUZH aims to create a circular economy where our organic products fund the digital ecosystem, and the digital token, in turn, facilitates the acquisition of physical goods.

-The Product: ZHOGIUZH Organic Chocolate

Our core physical product is a premium, ethically sourced, organic chocolate. Each bar is not just a treat but a gateway to the Solana ecosystem.

Organic Excellence: Sourced from sustainable farms.

Digital Integration: Every chocolate bar contains a unique, tamper-proof QR code inside the packaging.

-Tokenomics

Token Name: ZHOGIUZH

Blockchain Network: Solana (SPL Token)

Why Solana? We chose Solana for its ultra-low transaction fees, high throughput (TPS), and energy efficiency, ensuring a smooth experience for users scanning QR codes.

Distribution per Unit: Each chocolate barcode rewards the consumer with ZHOGIUZH token.

-The QR Scan Platform

To bridge the physical and digital, we are developing a custom web3 platform.

How it works: Users scan the QR code inside the chocolate wrapper using their smartphone.

Instant Reward: Upon scanning and connecting a Solana-compatible wallet (like Phantom or Solflare), 1,000 ZHOGIUZH tokens are instantly minted or transferred to the user's wallet.

Security: Each QR code is unique and can only be claimed once.

-Token Utility

Direct Purchase: In Phase 5, ZHOGIUZH tokens will be accepted as a primary payment method to buy more chocolate through our online store.

Staking & Rewards: Holders may earn exclusive access to limited-edition flavors or "Golden Ticket" prizes.

Governance: Large holders can vote on future chocolate ingredients or sustainability initiatives.

. Roadmap

Phase 1: Brand Registration (12/2025) – [COMPLETED]

Legal registration of the ZHOGIUZH brand and identity.

Phase 2: Token Creation (01/2026) – [COMPLETED]

Deployment of the ZHOGIUZH token on the Solana Mainnet.

Smart contract security audits.

Phase 3: QR Scan Platform Development (03/2026)

Building the mobile-friendly web3 interface for QR code validation and token distribution.

Phase 4: Chocolate Production (05/2026)

Manufacturing the first batch of organic chocolate with integrated QR codes.

Phase 5: E-Commerce Integration (08/2026)

Enabling "Pay with ZHOGIUZH" on our official platform.

- Sustainability & Ethics

ZHOGIUZH is committed to the planet. By using Solana, we minimize our digital carbon footprint. By producing organic chocolate, we support biodiversity and fair wages for cocoa farmers.
